# *Lab 1*

<u>Lab Report:</u> Wireshark ran smoothly with no issues to mention. It took a little bit to see how it works but other than that it a really cool program. I completed this lab 100% independently with no help from any outside resources.

<u>Lab Questions:</u>

1) Three different protocols that appear include TCP, MDNS protocol, and ARP.

2) 48.943 ms from when the GET message was sent to when the OK message was received.

3) gaia.cs.umass.edu: 192.168.95.64

   My Computer: 128.119.245.12

4) See Attached PDF…
